

Black Hole Pipebend instructions

step 1

All you really need to build this paper model, are the parts, a knife, glue (and some sort of cutting mat, if you don't want to ruin your desk...)

step 2

Cut out and pre-shape part 1. Take your time, and then start glueing the sections together one by one starting with one of the sides, so that you get a nice curve as shown here.

step 3

Next, glue part 2 to the bottom...
